PROFESSIONAL EXPERIENCE

Internship

2026

Cortech Systems Corporation

- Completed a 240-hour technical internship focused on hardware deployment and enterprise network configuration. Successfully integrated and configured IP settings for CCTV, intercoms, and security gates while assisting lead technicians with physical installations, routing, servers, and fiber optics. Additionally, bridged technical and business operations by providing cross-functional support to administrative teams for project documentation, pricing calculations, and client quotations.

College of Computer Studies and Engineering CpE Secretary

2023 - 2026

Asian College Dumaguete

- Supported administrative workflows and documentation for the Computer Engineering student organization over a three-year tenure. Assisted in the planning and execution of departmental events to drive student engagement, while helping coordinate communication among members, students, and faculty.

SEO Assistant (Part-time)

2023

DumaSpace | Designer Direct Perfume and Sunglasses

- Gained hands-on SEO experience by performing keyword research, on-page optimization, and supporting initiatives to improve content visibility and search rankings.

PROJECTS

Thesis: Development of Ripeness Detection Using Image Processing for a Tomato Robot

Role: 3D Designer & System/Hardware QA

- Collaborated on a robotic system project by designing 3D models for physical components and hardware housing. Supported pre-assembly hardware testing and troubleshooting for circuits, sensors, and mechanical parts. Assisted in validating system-level communication between image processing algorithms and the physical hardware, working with the team to resolve technical bottlenecks and deliver the final prototype.

TECHNICAL SKILLS

- Automation & Digital Marketing:** n8n Automation and Search Engine Optimization (SEO).
- 3D Modeling & Design:** AutoCAD and OnShape.
- Hardware & Networking:** Hardware Integration and Troubleshooting, Network Configuration (Routing, Servers, Fiber Optics), and Circuit/Sensor Testing.
- Programming & Web Development:** Python (IoT Data Analysis), JavaScript (Algorithms and Data Structures), Front-End Development, and Responsive Web Design

CORE COMPETENCIES

- Problem-Solving
- Willingness to Learn and Adaptability
- Time Management and Task Prioritization
- Teamwork and Collaboration
- Communication Skills

EDUCATION

Bachelor of Science in Computer Engineering (BSCpE)

Asian College Dumaguete | 2022 – 2026

Senior High School – STEM Track

Foundation Preparatory Academy | 2020 – 2022

CERTIFICATIONS

- Systems Analyst / Network Administrator of the Year (2026)
- 26th Philippine Statistics Quiz – 1st Place Winner & Regional Level Representative (2022)
- Analyzing IoT Data in Python - Datacamp 2026
- Introduction to Cybersecurity - Cisco Networking Academy 2026
- JavaScript Algorithms and Data StructuresV8 - freeCodeCamp 2025
- Front End Development LibrariesV8 - freeCodeCamp 2025
- Legacy Responsive Web Design V8 - freeCodeCamp 2024
